TIER: litigation-grade · Generated 2026-05-30 10:09:51 UTC · pipeline 0.1.0 · thresholds 0.1.1 · pack v0.1

Rate rows	4,868
Source MRFs	1
Hospital CCN	330154
View	headline

Selection criterion

Active-code rows flagged BOTH conflict (within-MRF cross-payer spread > 3.0x) AND outlier (vs Medicare ASP+6%).

Top flagged rows (lowest confidence first)

Code	Payer	Negotiated	vs ASP+6%	Conflict	Zombie	Conf.
J0881	6 Degrees Health	\$6,138.99	1998.37x	✓	?	0.65
J0881	6 Degrees Health	\$3,683.39	1199.02x	✓	?	0.65
J0881	6 Degrees Health	\$2,455.60	799.35x	✓	?	0.65
J0881	6 Degrees Health	\$1,841.70	599.51x	✓	?	0.65
J0881	6 Degrees Health	\$1,227.80	399.67x	✓	?	0.65

Methodology

Negotiated rates are compared against Medicare ASP+6% and flagged as outliers when the ratio is outside [0.2, 5]. Within each source MRF, a code is flagged as a conflict when its rates span at least 3x across 2+ payers. HCPCS codes with zero Medicare claims in the most recent annual Part B Spending file (data year 2023) are flagged as zombies, except codes superseded by a replacement code in the HCPCS Level II crosswalk. See README.md for full threshold definitions and confidence-score weights.

Provenance

Litigation-grade. 1 source MRF(s) attested in `provenance/{sha256}.json`. Each attestation carries the original download URL, fetch timestamp, file SHA-256, the **official CMS validator pass**, the hospital's CY2026 attester name (45 CFR 180.50), and the pipeline version captured at fetch time.

Pack content SHA-256

Hash of the sorted SHA-256s of ``rates.csv``, ``rates.json``, ``README.md``, and every ``provenance/*.json``. See ``manifest.json`` for the full chain.

0dbea6d63a9b560ff7a7d13ecc5d0295 b99f182fd49181b93f3b344ec3136400

v0.1 thresholds — Part B Spending data is published with an approximately 2-year lag. Cash-methodology rates may inflate conflict spreads. Verify the manifest SHA-256 chain before relying on this pack.
